PHLEBOTOMY

WHAT YOU WILL LEARN

EKG TECHNICIAN TRAINING

- ✓ Heart anatomy and electrical conduction system
- ✓ Medical terminology and patient preparation
- ✓ Electrode and lead placement
- ✓ Performing 12-lead EKGs
- ✓ Understanding heart rate and rhythm
- ✓ Recognizing common arrhythmias and artifacts

PHLEBOTOMY TRAINING

- ✓ Phlebotomy equipment, supplies and order of draw
- ✓ Venipuncture procedures
- ✓ Specimen collection and handling
- ✓ Laboratory practices and infection control
- ✓ Manikin-arm practice
- ✓ Live blood draws on people

IN-PERSON BUNDLE

Classroom lessons for both programs, EKG machine practice, venipuncture, live sticks, instructor guidance, and required hands-on training.

ONLINE BUNDLE

Complete lessons, PowerPoints, modules, assignments, quizzes, and tests through the program website at home. Required in-person hands-on training is included.

REQUIRED HANDS-ON TRAINING + UNLIMITED PRACTICE

All students attend hands-on training at the academy to practice EKG skills, venipunctures, specimen handling, manikin-arm practice, and live sticks under instructor supervision. Students may return on eligible training days for unlimited additional practice at no additional cost.
